A skilled MERN stack developer with 2 years of experience in building web applications using the MERN stack (MongoDB, Express, React, Node.js). Proficient in both front-end and backend development, and experienced in working with Agile methodologies and version control systems.

As a React Node.js stack developer, I specialize in crafting robust and dynamic web applications by leveraging the power of modern web technologies. With a keen eye for detail and a passion for clean, efficient code, I bring a wealth of experience in both frontend and backend development to every project I undertake.
